## Professional Summary

---

- AI & Data Science professional specializing in Agentic AI, NLP, ML/DL, and Python, with hands-on experience in end-to-end model lifecycle management using MLflow.
- Proven ability to analyze large datasets, debug SQL queries, and transform data into actionable insights that drive business decisions.
- Proficient in Power BI, Excel, and SQL, creating interactive dashboards and delivering advanced analytics, reporting, and data visualization.
- Track record in building intelligent systems, integrating AI agents, and performing market research, requirement gathering, and both qualitative and quantitative analysis.

## Relevant Coursework

---

- |                    |                    |                               |                            |
|--------------------|--------------------|-------------------------------|----------------------------|
| • Python           | • Agentic AI & RAG | • Data Wrangling              | • Data Cleansing           |
| • Machine Learning | • Generative AI    | • Power BI Desktop            | • Data Modeling            |
| • Deep Learning    | • SQL & MySQL      | • Power BI Services           | • DAX                      |
| • NLP              | • Data Acquisition | • Model Lifecycle with MLflow | • Statistics & Probability |

## Projects

---

### • House Price Prediction (Regression + EDA)

July 2025

Performed EDA on housing dataset to identify trends, correlations, and outliers. Built predictive models (Linear Regression, Random Forest) to estimate property prices. Visualized key factors such as area, number of rooms, and location affecting price.

### • Sentiment Analysis on Social Media

July 2025

Developed an NLP-based classifier to analyze tweets and measure public sentiment for brands.

### • Customer Churn Prediction

Aug 2025

Built a machine learning model to predict customer churn with 85% accuracy using Python, Scikit-Learn, and SQL.

## Technical Skills

---

**Languages:** Python (data processing, web scraping, NLP, analytical workflows), SQL (data extraction, query optimization)

**Libraries/Frameworks:** NLP, Streamlit, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, Data Analytics

**Analytical Tools:** Excel, Power BI, Power Query

## Certifications

---

- ▷ Python – OneRoadMap
- ▷ Data Analytics – Learntube.ai
- ▷ SQL – OneRoadMap
- ▷ Data Visualization – Forage

## Education

---

### • Makhanlal Chaturvedi National University, Bhopal

2022 – 2025

Bachelor of Computer Applications (BCA) | CGPA: 7.6

Bhopal, MP

### • Quality Thought IT Training Institute

2025 – Present

Data Science, Data Analytics, and AI (Python)

Hyderabad, Telangana
